

Yucheng Great Way Measure Tools Co., LTD is one of the largest professional manufactures of steel measuring tapes in China and produces over 500 different models of tapes. We are located in the famous “China Steel Tape Measure Town” where dozens of measure tools factories can be found. Great Way has incomparable access to the most advanced technology, equipment, and management in the industry. We practice best management procedures to assure the quality of all our products. We have many aesthetically pleasing designs for our customers to choose from. Our innovative designs, consistent quality and competitive prices has helped Great Way to become a leader in the hand tools industry. We continually improve our products and innovation as can be seen by the following design changes that we have made to assure that our tapes are among the best available. These changes have been made in advance of us entering the US market and are intended to assure our customers of the high quality of our designs and products. Take some time to compare our product to the leading brands and you can see for yourself how favorable and affordable our new tapes are compared to the leading brands.

#### Standard Quality

- Materials for Blade: #50 carbon steel in thickness of 0.11mm;
- Materials for Blade Coating: Resin;
- Materials for Spring: #50 carbon steel strip;
- Blade End Hook: Regular

#### Professional Grade Quality

- Materials for Blade: #50 carbon steel in thickness of 0.12mm that leads a longer standout of the blade;
- Materials for Blade Coating: Acrylic Paints that is more durable;
- Materials for Spring: Mn65 which is more smooth than Cs50 spring and owns longer life;
- Blade End Hook: better steel fitted with re-enforced plate at the back.
